D. HILL
NURSERY COMPANY
DUNDEE, ILLINOIS

GENERAL INFORMATION

• TERMS OF PAYMENT

Open Account: TERMS are 2% 10 days, NET 30 days. Goods will be supplied open account to customers of approved credit. Time must be allowed for investigation.

• SHIPPING AND NON-WARRANTY

Every order must be placed with definite shipping instructions. In no case can we assume responsibility for the shipment of stock after it has been accepted by the carrier. Liability for claims arising from delays or damage in transit rest solely with the carrier, but we will be pleased to assist with claims of this nature. Requests for adjustment and complaints must be made within 20 days after receipt of goods.

NO COMPLAINTS ENTERTAINED AFTER THIS 20 DAY PERIOD.

• AVAILABILITY

All orders are accepted on the condition that they shall be void should any injury befall the stock from causes over which we have no control.

• STOCKS NOT LISTED

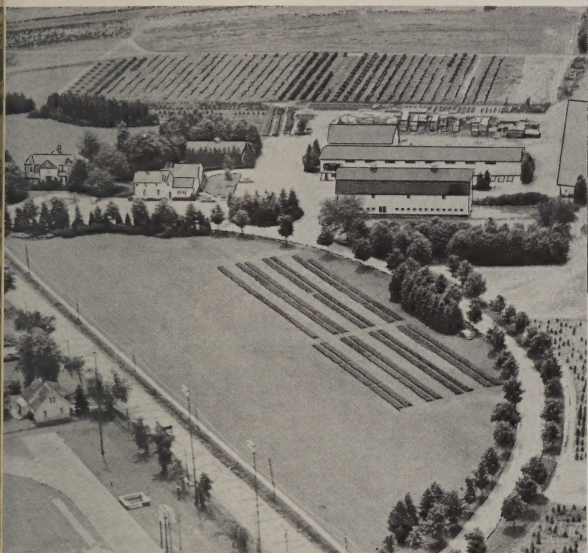

Many items in large sizes or not available in quantity are not listed herein. We invite your inquiries. You are cordially invited to visit our nursery at any time to inspect our stock.

PLEDGE TO OUR CUSTOMERS

Your purchase from Hills can be made with expectation that all nursery stock will be as represented, and of best quality. Our evergreens are grown according to the best, presently-known scientific methods. Transplanting and root-pruning are done at proper growth stages, to develop a strong, fibrous root system. Nursery stock is cared for, and handled by, personnel with many years of know-how.

There exists, however, numerous transplanting conditions over which the nursery cannot exercise control — inadequate or infrequent watering, planting site, improper handling and injury, soil conditions, adverse weather — all of which can affect plant growth for the customer. Consequently there cannot be any warranty to assure successful transplanting, or continued growth of plants.

D. Hill Nursery Company will immediately, and satisfactorily, adjust any errors or omissions in filling customers' orders, upon being promptly and properly notified.

DUNDEE QUALITY (Pre-Staked) JUNIPER GRAFTS

Note: Orders for 300 or more at the 1000 rate.

100 .75 1000 .65

SILVER OR BLUE CEDAR

(Juniperus virginiana glauca)
Familiar favorite of the landscape architect. An open-graceful, upright with soft, bright-blue foliage. Grows to 10 feet rapidly in sun or light shade. Light annual trimming required for maximum fullness.

DUNDEE JUNIPER

(Juniperus virginiana-Hill)
Best-known and most popular of the Hill introductions. A smooth, cone-shaped upright Juniper with soft needle-type foliage. Steel-blue color in the summer, changing to an attractive plum shade during the winter months. Dundee Juniper grows rapidly to a height of 12 feet in full sun or light shade. Especially adapted to entrance plantings.

Available Shipment About May 1, 1960

Hill's openly invites comparison of their superior quality Juniper Grafts with all similar products advertised "just as good." Hill's has always SET the standards.

AMES JUNIPER

(*Juniperus chinensis*-Ames)

An extremely hardy form of Chinese Juniper selected at Iowa State College in 1945. Broad conical upright shape, with sharp, blue-green foliage. Fairly rapid growth to a mature height of 5 or 6 feet. Prefers full sun in an exposed location.

IOWA JUNIPER

(*Juniperus chinensis*-Iowa)

An ideal Juniper for corner accent planting. This hardy Juniper selection was made at Iowa State College. Grows in irregular cone shaped, with heavy blue - gray foliage. Reaches a height of 7 or 8 feet rapidly in full sun.

MANEY JUNIPER

(*Juniperus chinensis*-Maney)

Easily the best new spreading Juniper. This semi-erect spreading Juniper has heavy coarse foliage of distinct blue color. It will grow rapidly to an ultimate size of 2 feet high and 4 feet wide in either full sun or light shade, an excellent variation to the more common forms of spreading Juniper.

MOUNTBATTEN JUNIPER

(*Juniperus chinensis* Mountbatten)

Selected in Canada for its extreme hardiness, and complete freedom from Cedar Apple Rust. A very smooth conical upright of blue-gray color. It grows rapidly to a height of 10 or 12 feet in full sun or partial shade.

BLUE HAVEN JUNIPER

(*Juniperus scopulorum*-Blue Haven)

The brightest and most intense blue color of any upright Juniper. This narrow conical upright has fine textured foliage. Grows to 8 or 10 feet under the full sun and exposure conditions of the Central Plain States. Excellent color-contrast plant.

PATHFINDER JUNIPER

(*Juniperus scopulorum*-Pathfinder)

An ideal selection for formal accent. A very symmetrical slender cone with smooth-textured foliage. A pleasing blue color throughout all seasons. Grows rapidly to a height of 8 to 10 feet in the full sun and dry environment of the Great Plains, Mountain States and the Southwest.

SILVER GLOW JUNIPER

(*Juniperus scopulorum*-Silver Glow)

An eye-catcher in any nursery or landscape planting. A symmetrical cone shape of smooth texture. Silvery, iridescent blue color. Grows rapidly to a height of 8 or 10 feet with good adaptation to the hot sun and climate in the Central Plains and Mountain States.

WELCH JUNIPER

(*Juniperus scopulorum*-Welch)

An ideal Juniper for entrance planting. Smooth cone-shaped, with soft silver-blue foliage. Growth habit characterized by many distinct erect branches. Will reach a height of 10 feet. Likes full sun and well-drained location.

CANAERT JUNIPER

(*Juniperus virginiana*-Canaert)

Most popular of all the green Junipers. A graceful, open upright with soft dark green foliage. Will reach a height of 8 to 10 feet in a fully exposed location. Very attractive clusters of bright blue berries in the Fall.

HILLSPIRE JUNIPER

(*Juniperus virginiana* cupressifolia)

The Hillspire Juniper is a D. Hill introduction that becomes more popular each year. A symmetrical, cone-shaped upright Juniper requiring a minimum of trimming. Soft, bright green foliage with dark blue berries in the Fall. Fast growing to a height of 8 or 10 feet in full sun.

AMERICA'S LARGEST EVERGREEN GROWERS

D. HILL'S FINEST QUALITY BALLED AND BURLAPPED

The balling and burlapping of evergreens is recognized as a nurseryman's "art." At HILLS, this important plant-handling operation is entrusted only to trained diggers" and experienced supervisors. Each specimen plant, tagged to grade size at inventory time, is dug as an individual, and is tightly burlapped. Strong sisal rope is used to secure the burlap efficiently. Only healthy, vigorous evergreens are selected to fill customers orders and all plants are fully-to-size as represented.

PYRAMIDAL CONCOLOR FIR

(Abies Concolor Pyramidalis)

New type of ornamental evergreen. Trained to narrow, pyramidal growth. Blue colored foliage. Grows to 10 to 12 feet, good in sun or shade.

	Each, Rate of	
	10	100
3 feet	9.00	
4 feet	13.00	

BLUE COLUMN CHINESE JUNIPER

(Jun. Chi. Columnaris Glauca)

Extremely hardy favorite for entrance plantings. Narrow upright growing with blue-green sharp needles. Reaches 10 or 12 feet. Does best in fully exposed locations.

	Each, Rate of	
	10	100
3½ feet	6.00	5.50
4 feet	6.50	6.00
4½ feet	7.00	6.50

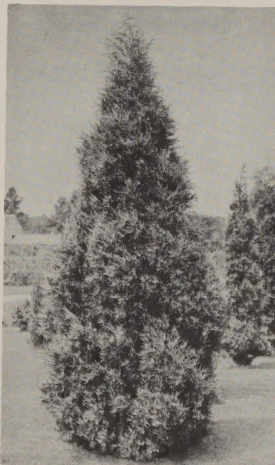

KETELEER JUNIPER

(Juniperus Chinensis Keteleeri)

A true upright form of Chinese Juniper, free from cedar apple rust. It has a good color, is rapid growing, and has very attractive berries.

	Each, Rate of	
	10	100
3 feet	6.00	5.50
3½ feet	6.50	6.00

D. HILL NURSERY CO. DUNDEE, ILL.

BALLED AND BURLAPPED

D. Hill's Finest Quality

PFITZER JUNIPER

PFITZER JUNIPER

(Jun. Chi. Pfitzeriana)

Almost too much of a favorite to need a description. Pfitzer is a fast growing spreader reaching 6 feet in width and 3 feet in height. Hardy in all locations. An excellent entrance and background plant. Green to blue-green color.

	Each, Rate of	
	10	100
1½ feet	2.75	2.50
2½ feet	3.90	3.50
3 feet	4.40	4.00

BLUE PFITZER JUNIPER

BLUE PFITZER JUNIPER

(Jun. Chi. Pfitzeriana Glauca)

Another of the popular "Pfitzer Family." Bright blue, prickly foliage. Grows slightly more compact than regular Pfitzer. Hardy in all locations. Beautiful against red brick or the popular red-wood ranch homes.

	Each, Rate of	
	10	100
2 feet	3.50	3.10
2½ feet	4.75	4.10

VASE SHAPE PROSTRATE JUNIPER

KALLAY'S PFITZER JUNIPER

(Jun. Chi. Pfitz. Kallay)

Dwarf compact spreading Juniper. Heavy green foliage. Requires little shearing. Ideal for window-box or under picture window. 3 to 4 feet wide.

	Each, Rate of	
	10	100
1½ feet	2.90	2.60
2 feet	3.50	3.10

VASE SHAPE PROSTRATE JUNIPER

(Jun. Com. Dep. Vase Shape)

Graceful upright juniper with a wide "vase shape." Unusual two color needles showing white on the underside. Long time favorite of the landscape architects. Does best in full sun. Grows 4 feet high and 3 feet wide.

	Each, Rate of	
	10	100
1½ feet	3.30	3.00
2 feet	3.85	3.50

BALLED AND BURLAPPED

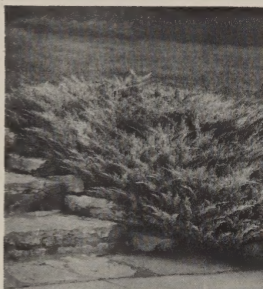

D. Hill's Finest Quality

ANDORRA JUNIPER

(Jun. Horizontalis Plumosa)

Beautiful blue-green creeper that turns a pretty "plum" color in the Fall. This old favorite is very popular with the designers of low, ranch homes. Full sun or partial shade. Very hardy. 5 feet wide and 10 inches high when mature.

	Each, Rate of	
	10	100
15 inches	2.95	2.75
2½ feet	4.50	4.00

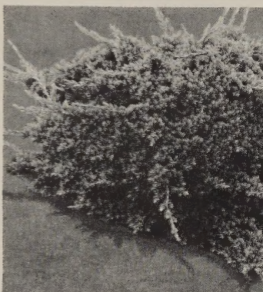

ANDORRA JUNIPER

JAPANESE JUNIPER

(Juniperus Procumbens)

This is the best of the blue creeping junipers. Often used in borders, along banks and against backgrounds of flowers or other evergreens. Likes full sun best. Moderately slow growing to ultimate 10 foot width and 1 foot height. This is really a tough hardy plant.

	Each, Rate of	
	10	100
2½ feet	5.00	4.50

JAPANESE JUNIPER

ARCADIA JUNIPER

(Jun. Sabina Arcadia)

A low growing tree, with a spread of 4 to 5 ft. Bright green foliage. Good for under-window planting. Grows best in full sun.

	Each, Rate of	
	10	100
2 feet	4.25	3.75

SILVER GLOW JUNIPER

(Juniperus scopulorum-Silver Glow)

An eye-catcher in any nursery or landscape planting. A symmetrical cone shape of smooth texture. Silvery, iridescent blue color. Grows rapidly to a height of 8 or 10 feet with good adaptation to the hot sun and climate in the Central Plains and Mountain States.

	Each, Rate of	
	10	100
3½ feet	6.50	6.00
4 feet	7.75	7.00

SILVER GLOW JUNIPER

GROWING BEAUTIFUL TREES SINCE 1855

BALLED AND BURLAPPED

D. Hill's Finest Quality

HILLSPIRE JUNIPER

(Juniperus virginiana cupressifolia)

The Hillspire Juniper is a D. Hill introduction that becomes more popular each year. A symmetrical, cone-shaped upright Juniper requiring a minimum of trimmng. Soft, bright green foliage with dark blue berries in the Fall. Fast growing to a height of 8 or 10 feet in full sun.

	Each, Rate of	
	10	100
12 inch	1.95	1.75
15 inch	2.85	2.50

HILLBUSH JUNIPER

GLOBE HILLBUSH JUNIPER

(Jun. Virginalis Globosa)

This new introduction of Hill's is increasing in popularity each year. Globe shape without trimming. Fully hardy in all locations. Frequently used where a "Pfitzer would get too large." 3 feet high and 3 feet wide. Moderately slow growing.

	Each, Rate of	
	10	100
10 inch	1.70	1.50
12 inch	1.95	1.75
15 inch	2.90	2.50
1½ feet	3.75	3.25

GLOBE HILLBUSH JUNIPER

HILLSPIRE JUNIPER

(Jun. Virginiana Cupressifolia)

Smoother and more formal than Canaert juniper. Fast growing; bright green upright that will reach 6 or 7 foot height quickly and with minimum trimming. Sunny locations best.

	Each, Rate of	
	10	100
3 feet	6.00	5.50
3½ feet	6.50	6.00
4½ feet	9.00	8.00

SILVER OR BLUE CEDAR

(Juniperus virginiana glauca)

Familiar favorite of the landscape architect. An open-graceful, upright with soft, bright-blue foliage. Grows to 10 feet rapidly in sun or light shade. Light annual trimming required for maximum fullness.

	Each, Rate of	
	10	100
3 feet	7.00	6.50
3½ feet	7.75	7.00
4 feet	9.00	8.00

HILLSPIRE JUNIPER

BALLED AND BURLAPPED

D. Hill's Finest Quality

DUNDEE JUNIPER

(Juniperus virginiana-Hill)

Best-known and most popular of the Hill introductions. A smooth, cone-shaped upright Juniper with soft needle-type foliage. Steel-blue color in the summer, changing to an attractive plum shade during the winter months. Dundee Juniper grows rapidly to a height of 12 feet in full sun or light shade. Especially adapted to entrance plantings.

3 feet	6.00	5.50
3½ feet	6.50	6.00
4 feet	7.75	7.00

DUNDEE JUNIPER

NORWAY SPRUCE

(Picea Excelsa)

Fastest growing Spruce. Trims well into specimen "front yard" tree. Can be grown to 25-35 feet. Good also for windbreak planting. Likes sun.

	Each, Rate of	
	10	100
15 inch	1.95	1.75
1½ feet	2.40	2.00
2 feet	2.90	2.50

DWARF ALBERTA SPRUCE

DWARF ALBERTA SPRUCE

(Picea Glauca Conica)

Very slow growing, miniature spruce. Bright green, never gets over 3 to 3½ feet high. Fully hardy in all locations. Often used in small gardens or for miniature accent points. Grows so symmetrical as to appear artificial.

	Each, Rate of	
	10	100
10 inch	1.75	1.50
12 inch	2.35	2.00
1½ feet	3.50	3.00
2 feet	5.50	5.00

SERBIAN SPRUCE

(Picea Omorica)

Slow growing. Short needles of a gray-green color. Ornamental lawn tree. Height 12 to 15 feet. Sun or part shade.

	Each, Rate of	
	10	100
3½ feet	6.75	6.00
4 feet	7.75	7.00

NORWAY SPRUCE

AMERICA'S BIGGEST EVERGREEN GROWERS

BALLED AND BURLAPPED

D. Hill's Finest Quality

COLORADO SPRUCE

COLORADO SPRUCE

(Picea Pungens)

Popular bluish - green color. Ideal for lawn, or garden. Trims easily. Needs sun. Frequently chosen for growing as an outdoor Christmas tree.

	Each, Rate of	
	10	100
2 feet	4.25	3.75
2½ feet	5.00	4.50

AUSTRIAN PINE

(Pinus Nigra)

Darkest green of all the pines. Heavy, long needle with strong "North Woods" fragrance. Best for garden backgrounds and screen use. Rapid growth to 15 feet. Good for "permanent Christmas Tree use," as specimen plant.

	Each, Rate of	
	10	100
2½ feet	4.50	4.00
3 feet	5.50	5.00
3½ feet	6.50	6.00
4 feet	8.00	7.00

AUSTRIAN PINE

SCOTCH PINE

(Pinus Sylvestris)

In mature form (18 to 20 feet) the Scotch Pine is often flat topped with bright orange bark. Very picturesque. Goes well with ranch houses as background and border planting. Very tough and hardy. Fast growing 1 to 2 feet per year.

	Each, Rate of	
	10	100
2 feet	3.50	3.00
2½ feet	4.00	3.50
3 feet	4.75	4.25
3½ feet	5.50	5.00
5 feet	7.25	6.50
5½ feet	8.00	7.00
6 feet	9.00	8.00

TABLE PINE

TABLE PINE

(Pinus Tanyosha)

Long needles, light-green color. Growth habit resembles "mushroom", atop stem. Height 3-4 feet. Likes sun best.

	Each, Rate of	
	10	100
15 inch	5.25	4.75
1½ feet	6.25	5.75
2 feet	7.25	6.50

D. HILL NURSERY CO. DUNDEE, ILL.

BALLED AND BURLAPPED

D. Hill's Finest Quality

DOUGLAS FIR

(Pseudotsuga Douglasi)

This symmetrical forest type tree reaches 25 to 30 feet when fully grown. Heavy, soft needles that are held on branches right to the ground. Likes full sun and relatively dry locations. Very rapid growth. This is the best "Christmas Tree" type available.

Each, Rate of
10 100

2 feet	3.85	3.50
2½ feet	4.95	4.50
3 feet	5.50	5.00
3½ feet	6.00	5.50
4 feet	6.75	6.00

DOUGLAS FIR

PYRAMIDAL DOUGLAS FIR

(Pseudotsuga Douglasi Fastigiata)

Green foliage. Narrow Christmas tree shape. Can be used as a background plant in the shrub border where there is limited space.

Each, Rate of
10 100

2½ feet	5.50	5.00
3 feet	6.50	6.00
3½ feet	7.75	7.00

UPRIGHT JAPANESE YEW

(Taxus Cusp. Capitata)

A slow growing, deep rich colored, conical upright. Matures at 10 to 12 feet. Stands hard trimming very well and can be kept in tight formal shape easily. Does equally well in sun or shade. Best for entrances and corners.

Each, Rate of
10 100

12 inch	2.25	2.00
15 inch	2.75	2.50
1½ feet	5.90	5.50
2 feet	6.25	5.75

UPRIGHT JAPANESE YEW

COMPACT SPREADING YEW

(Taxus Cusp. Densiformis)

A selected compact strain of the well known Spreading Yew. This plant, because of its dense habit, finds many uses in general landscape plantings where space is restricted.

Each, Rate of
10 100

12 inch	4.25	3.90
15 inch	5.90	5.50

COMPACT SPREADING YEW

OVER 1000 ACRES OF EVERGREENS

D. HILL'S QUALITY PLANTAINER-GROWN EVERGREENS & PLANTS

Plantainer growing is the greatest advancement in growing Evergreens, in years, the trees are healthier, they grow faster, and they are easier to handle. It is like moving "a little piece of the nursery"—the plant never knows it's been moved. The roots remain intact and undisturbed and continue to grow without transplanting shock. Start today . . . the handy and inexpensive Plantainer way.

PATIO FENCING

Easy to Erect —

Easy to Maintain

Patio Screens are easy to erect. If wood or metal fences are available, they may be attached by means of staples or short pieces of wire. If not, they may be attached to wire or metal runners between wood or metal posts. The screens have stood the test of time and weather . . . are safe for all uses. Once erected they need practically no attention. If desired, Patio Screens may be varnished, painted or treated with special wood preservatives. This later is recommended in unusually humid or semi-tropical areas.

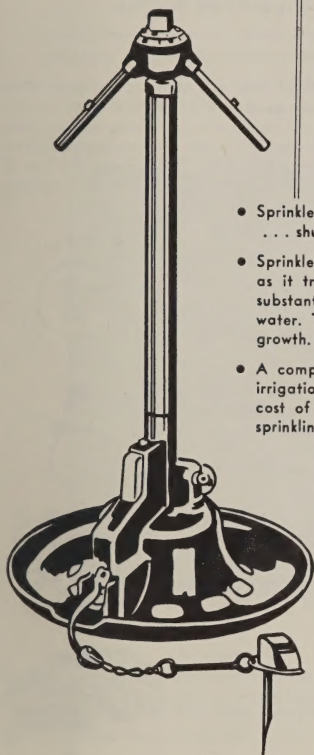

Tough and Durable

Patio screens are of selected bamboo-type reeds, grown in free running water. These reeds (not to be confused with marsh reeds) are of a tough fiber that has been properly cured and chemically treated to give years of service. For fabrication, selected and treated reeds are cut to size and securely bound with rust-proof steel wire at 4-inch intervals. The finished screen measures a full 6-feet 4-inches high by 25 feet long but is shipped in a compact 15-inch roll, weighing about 28 pounds.

\$10.77 per Roll F.O.B., Dundee, Ill.

Sunbeam Rain King

AUTOMATIC TRAVELING SPRINKLERS

- Sprinkles any area up to 125 feet . . . shuts off automatically.
- Sprinkles areas 5 to 50 feet wide as it travels. Each plant receives substantially the same amount of water. This contributes to uniform growth.
- A complete automatic method of irrigation at a fraction of the cost of overhead or underground sprinkling systems.

WILT-PRUF

**Protects Your Valuable Plant Material
Against Damaging Moisture Loss in
Hot and Cold Weather.**

What WILT-PRUF Is . . . WILT-PRUF is a plastic latex liquid. When plant material is sprayed or dipped in WILT-PRUF, it forms a colorless film which retards normal moisture loss. In lining out, in transplanting, in late-season planting, and under certain adverse weather conditions, this protection against drying out prevents the loss of valuable plant material and eliminates the need for costly replacements. (In due time, the WILT-PRUF coating wears away.)

Protection in Summer . . . WILT-PRUF coating enables plants to retain their vital moisture while new moisture-absorbing roots are being formed in their new locations. This prevents the most common cause of transplanting loss.

Protection in Winter . . . Winter sun and wind promote evaporation while the frozen ground prevents the intake of additional moisture. WILT-PRUF winter coating retards evaporation, keeps plants healthier and more beautiful.

Protection Against Pests . . . When applied with WILT-PRUF, insecticides and fungicides stick to plant surfaces longer. The number of applications are greatly reduced, saving material, time and labor. Always add WILT-PRUF last.

Protection in Transit . . . Shipments of nursery stock, and other ornamental plant material, arrive at their destinations looking fresher and more attractive when protected with WILT-PRUF.

Preserves Christmas Trees and Greens . . . Christmas Trees sprayed with WILT-PRUF retain their needles, look greener and fresher too.

How to Handle WILT-PRUF . . . WILT-PRUF comes in concentrated form. For protecting plants against drying out, mix 1 part WILT-PRUF with 4 to 9 parts water, according to directions on label. As a carrier for pesticides use 1 pint WILT-PRUF to 100 gallons of water. WILT-PRUF may be used in any spray equipment except gear pumps with close tolerances.
